Question 1 — 1 pts

Which of the following IS a human interaction device?

- ○ Code Memory (ROM)
- ○ Serial Ports
- ○ Temperature Sensor
- ○ Data (RAM)
- ◉ Mouse

Question 2 — 1 pts

TRUE OR FALSE: The device to the right for the microprocessor-based system below is a ROM.

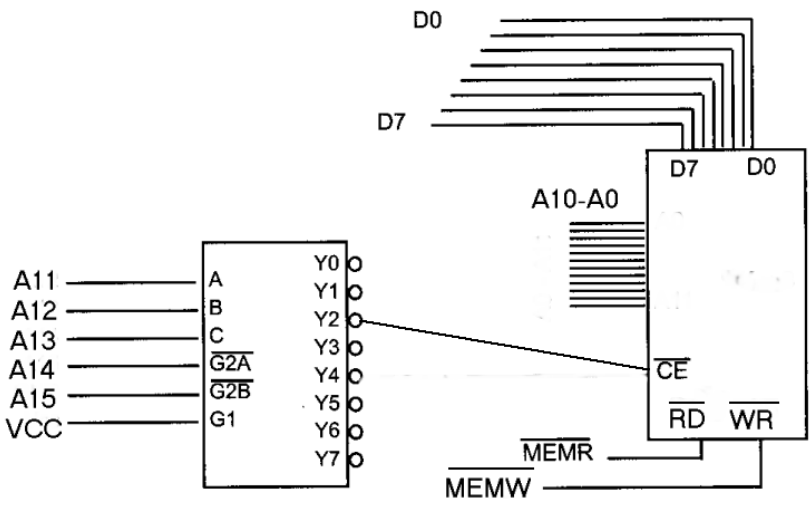

- ○ True
- ◉ False

Question 3

1 pts

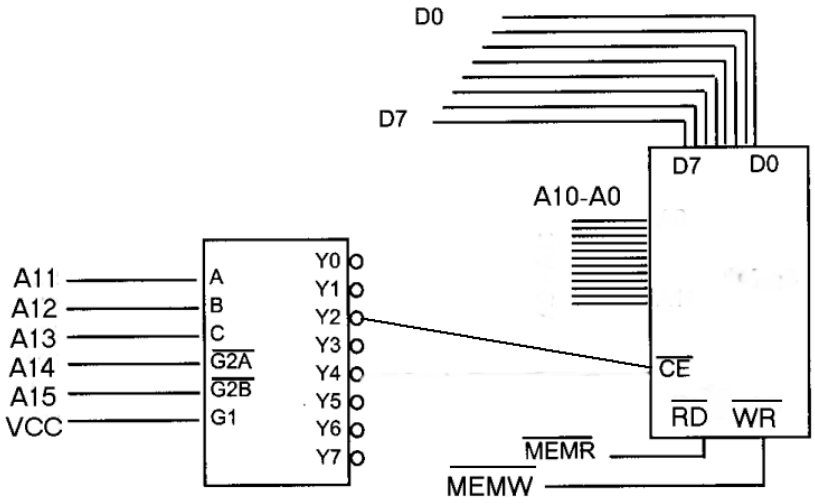

In the microprocessor-based system below, what are the values of the address lines (A15 A14 A13 A12 A11) used to enable (CE) the device on the right?

- ○ A15 = 1, A14 = 1, A13 = 0, A12 = 0, A11 = 1
- ○ A15 = 1, A14 = 0, A13 = 0, A12 = 1, A11 = 1
- ○ A15 = 0, A14 = 1, A13 = 0, A12 = 0, A11 = 0
- ◉ A15 = 0, A14 = 0, A13 = 0, A12 = 1, A11 = 0

Question 4 2 pts

Which is the size (number of words x number of bits per word) of the device on the right below?

- (●) 2k words x 8 bits
- ( ) None of the above
- ( ) 8k words x 8 bits
- ( ) 4k words x 8 bits

Device A10-A0 => 11 address lines

2^11 = 2^1(2^10) = 2 (1k) = 2k words

Data lines D7-D0 => 8 data lines (8 bit words)

2k words x 8 bits
