

Rules for Formula/Note Sheet:

1. Please use a standard 8.5 by 11 sheets of paper for your notes.
2. You're allowed to utilize both sides of the paper.
3. Please refrain from including worked examples.
4. Ensure all formulas are presented in a generic format, avoiding specific numerical values.
5. Avoid providing step-by-step instructions.
6. Do not include any sample graphs or images on the sheet.
7. Your name must be clearly written on the sheet before turning it in.
8. Avoid any corrections made by scratching out, erasing, or using whiteout.
9. Notify me before the exam begins if you do not have a sheet.
10. If you'd like me to review your sheet for any issues, kindly email it to me prior to the exam.

Failure to adhere to the aforementioned rules will be deemed as academic dishonesty, and the instructor retains the authority to deduct points based on the perceived advantage gained from unauthorized materials on the sheet. Additionally, such violations will be reported to university authorities.

CAN DO THINGS LIKE THIS

Definitions of terms

Formulas (generic)

Describe symmetry in words

x	x1	x2	x3
p(x)	p(x1)	p(x2)	p(x3)

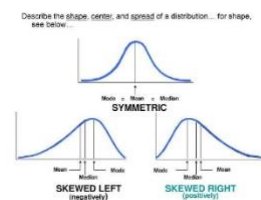

Median – resistant to outliers

Mean – not resistant to outliers

CANNOT DO THINGS LIKE THIS

Categorical variable (Ex gender)

Quantitative variable (Ex price)

x	1	2	3
p(x)	0.3	0.5	0.2

$$\bar{x} = 8; M=3$$
